This 26 acre tract has a nice variety of good build sites. Offering a 1.5 acre pasture, with a septic permit on file, with the remainder in mature woods, with a small stream bordering the NE side of the property. This tract could also be subdivided up to 5 times, so plenty of options for a developer. This tract is in a nice area with easy access to Pickens. A well and septic will need to be installed. Light restrictions, stick built only, 1200 sq ft minimum.
